Re: 2022 Akin Rd Street Rehabilitation Project  
City of Farmington, Minnesota

Dear Property Owner/Current Resident:

The City of Farmington is proposing a street rehabilitation project of Akin Road in 2022. The attached map illustrates the extents of the project per the City's overall Capital Improvement Plan. This letter is simply intended to inform you of the upcoming project for which multiple opportunities for your input will be provided.

**PROJECT SURVEYING TO BEGIN**

Surveying in the proposed project area, which includes collecting field measurements and survey information, is expected to begin the week of March 28 and continue over the next few weeks. Surveying will be conducted by the city's engineering consultant, Bolton & Menk, and is weather dependent. Surveying will be primarily conducted from the street but may take place in yards and driveways. Underground utilities will be temporarily marked with flags or paint. Please leave these markers in place until survey crews have completed work in the area. Please follow social distancing guidelines and do not approach anyone completing field work in the project area. Instead, contact city staff to ask questions or learn more about the project. During the COVID-19 pandemic, the health and well-being of our community is our top priority. Thank you for your help to slow the spread of coronavirus.

**PROJECT QUESTIONNAIRE**

The enclosed questionnaire is one resource used to identify infrastructure needs as observed by neighborhood residents. Your time and effort to complete and return this questionnaire is much appreciated. Following collection of this information, the City will host a neighborhood meeting expected in April of 2022, for which a separate mailing will be sent, to inform residents about the project and collect additional input.

The enclosed questionnaire can be mailed or dropped off at Farmington City Hall located at 430 Third St. Farmington, MN 55024 or emailed to [Matt.Blazer@bolton-menk.com](mailto:Matt.Blazer@bolton-menk.com). Should you have any questions about this, please feel free to contact either of the individuals below who will be glad to assist.

Sincerely,  
City of Farmington

Matt Blazer, P.E.  
Project Manager  
Bolton & Menk
