

## **Spring Yard Cleanup**

Want to improve your curb appeal and do your part for clean water at the same time? This spring, if you have leaves and grass to remove from your yard, compost your leaves or put them in your yard waste bin for pickup. Leaves and grass clippings blown into the street look messy, clog storm drains, and add unwanted nutrients to our waterways.

### **Do:**

- Compost your leaves on your own property.
- Leave grass clippings on your lawn to act as fertilizer.
- Hire a yard service that properly disposes of leaves.

### **Don't:**

- Blow leaves or grass clippings onto the street.
- Dump leaves or grass into a ditch or storm drain.
- Burn yard waste.
