

Corridor Issues

Highway 47
Traffic Backups &
Congestion

High Crash Rate
(higher than state-wide average)

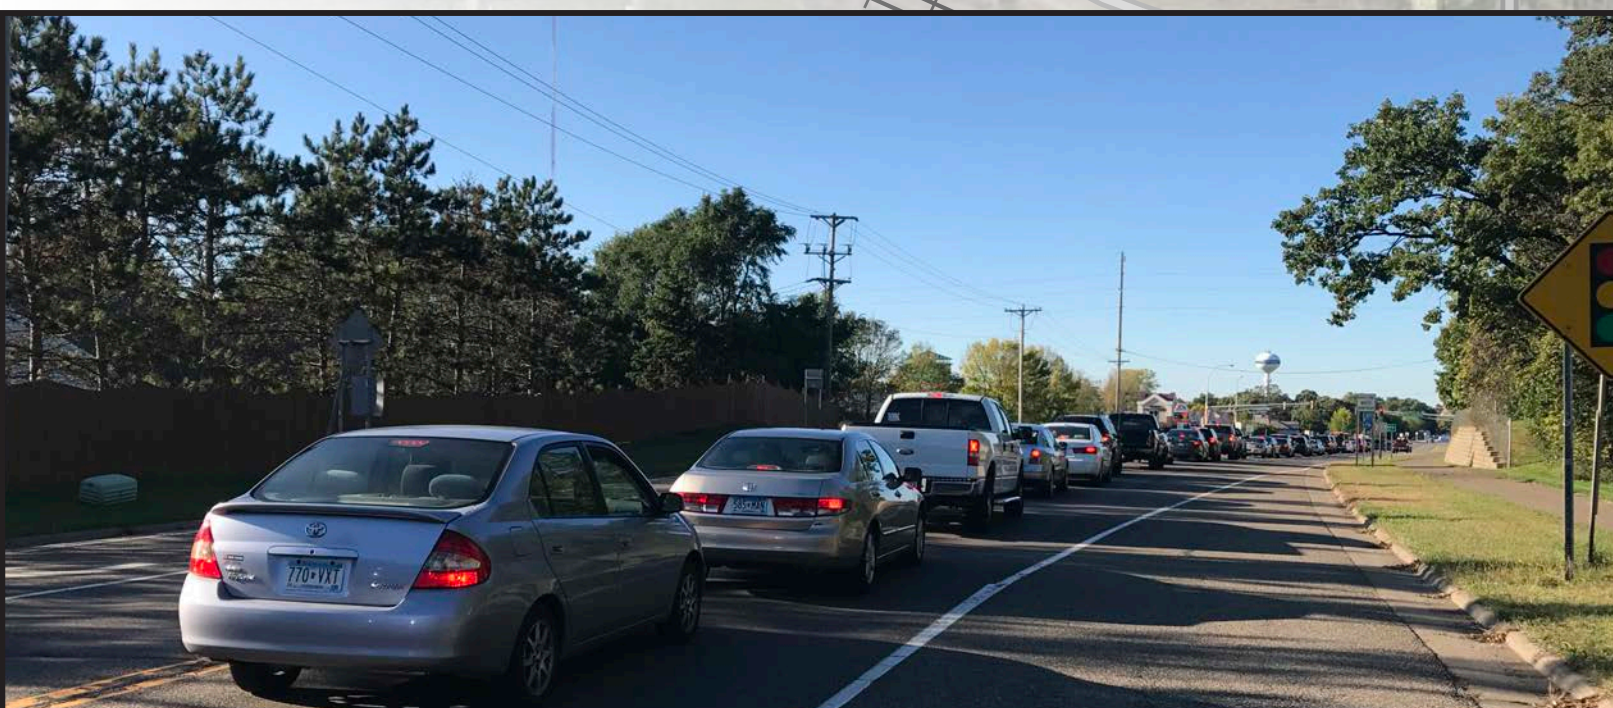

Sidestreet Backups
& Delayed Access
to Highway 47

Crash rate more than 3x average.
Severe crashes are a concern.

Congestion builds behind left-turning
vehicle at the McKinley Street intersection

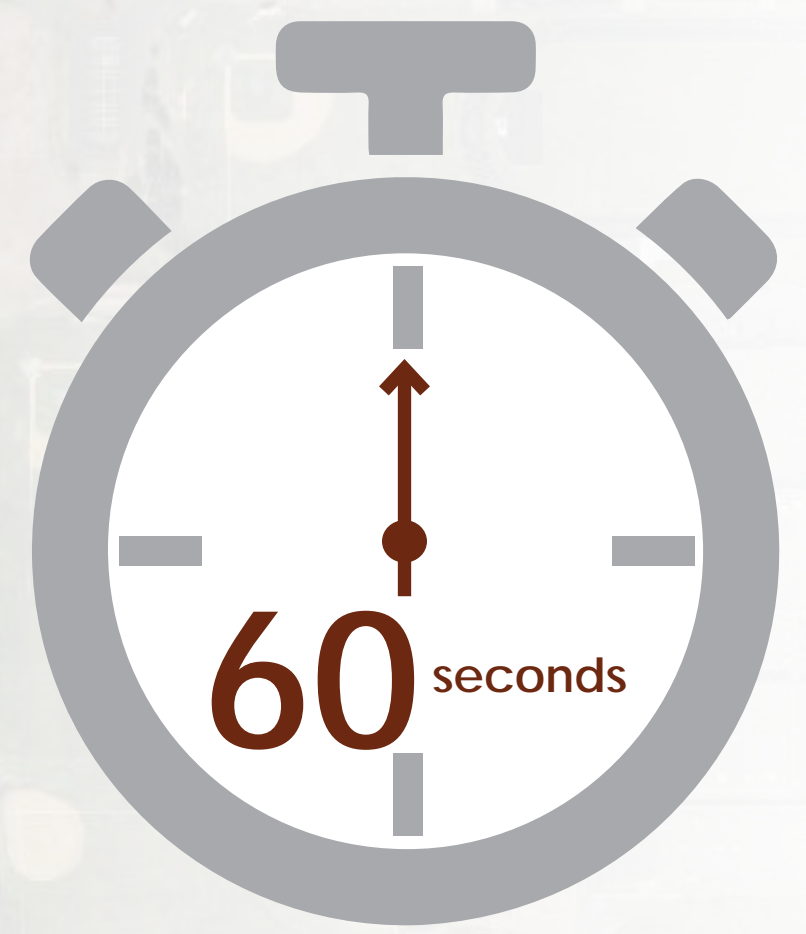

Lack of flexibility for turns.
Property access adds to congestion
and safety issues

Residents experience delayed access.

A driver will wait

before making a risky move into
traffic or taking a different route

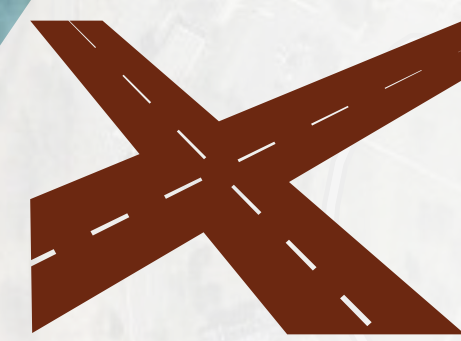

3 out of 5
intersections within
the corridor see
wait times up to
2 minutes

Backups lengths
during peak travel
times and when trains
block crossing.

Corridor Needs

improvements will
reduce crashes
and provide more
reliable access
to the highway

Improve
intersection
operations
& safety

Provide safe
pedestrian
& bicyclist
routes

Provide safe
driveway access

Accommodate
future growth
