

Brooklyn Center Zoning Code Update Virtual Community Meetings

Did you know the last time the Zoning Code had a comprehensive update was in the 1960s?

Brooklyn Center is updating its current zoning code. Zoning codes are the rules that determine *what* can be built, *where* it can be built and *how* it should look. Every city has zoning codes and they are the primary tools a city has to guide the use of its land. Zoning codes are a balance between private property rights and public good.

The purpose of updating the City's Zoning Code is to:

- Align it with the 2040 Comprehensive Plan
- Bring it into compliance with state law
- Reorganize it so it is clearer and easier to understand
- Modernize regulations and make sure they meet the needs of the current community

Join in on a series of Virtual community meetings to learn about the project and share your visions for the future of zoning.
