Project Update

During the week of October 24th, crews continued service installation on Main Street. Crews also began storm sewer installation on the north end of Main Street.

During the week of October 31st, crews will complete the storm sewer on the north end of main street. Storm sewer installation will continue on the south end of Main Street heading north to the intersection of Main Street and 3rd Avenue. Crews will also be completing service installation on the south end of Main Street.

Once the storm sewer is complete, street grading will begin. Crews will be cutting the roadway down to the bottom of the planned road section. Subdrain will be installed during this time prior to placement of base material. Access will be intermittent due to grading operations and will be maintained as much as possible.

ATTENTION TO ALL RESIDENTS ON TEMPORARY WATER: *Over nights extended periods of time when water usage is limited, please allow one of your faucets to run slightly if temperatures are below freezing.* (You will not be charged extra for this water usage). This will help prevent the temporary line from freezing as overnight temperatures drop. Continue this until the temporary service is no longer in use.

Contacts

If you have questions or concerns at any time, please contact Lane at 507-226-3469 or lane.welch@bolton-menk.com.
