

## CONSTRUCTION UPDATE

McNamara Construction is scheduled to begin paving the final layer of pavement on all stages of the project beginning on Thursday, May 14 (weather permitting).

Paving is anticipated to begin in the morning and last about a half a day. **Please have all cars off the street during paving.**

During paving, you will have limited or no access to your driveway for short durations while work occurs in front of your property. The asphalt will typically be installed at temperatures between 275° F and 350° F. Please have children stay away from the asphalt until it cools, which will be after it's rolled the same day. If you need to drive over the fresh asphalt, please keep your speed low to avoid spinning your tires and harsh turning motions.

Access is anticipated to be restored shortly after the asphalt is paved (within an hour) so the roadway and driveways can be used the same day they are installed.

*Thank you for your continual patience and cooperation throughout the process of improving your street and utilities!*

We apologize for any inconvenience this may cause you. If you have any questions or concerns during construction, please call **Brad Fisher at (612) 759-7240**.
