Hayfield City Engineer  
Cell: (507) 525-2685  
E-mail: [derek.olinger@bolton-menk.com](mailto:derek.olinger@bolton-menk.com)

### Project Overview

As you know, the City of Hayfield is undertaking a construction project to improve the various city streets. For the project location please see the attached map. Wencl Construction from Owatonna, MN was awarded the contract on May 24, 2021.

One portion of the project involves storm sewer and pavement improvements to the alley north of Main Street between Center Avenue and 1<sup>st</sup> Avenue NE.

### Project Timeline

**Work is tentatively scheduled to begin the week of June 28<sup>th</sup> but is subject to change.** During the first phase, the contractor will be removing pavement and installing storm sewer. After removals and underground work is complete the alley will be restored to gravel. While this work is occurring, there may be times when you will not be able to access parking in the alley. If this is the case, please use nearby streets for parking until the alley is accessible again.

### Private Utilities

You may have noticed that some work has already started in the project area. Prior to Wencl Construction arriving on site, some crews will be relocating and replacing gas and electrical lines in the project area. This work will require some interaction with the gas/electrical company's contractors.

Please note that throughout the project, there may be temporary service interruptions to gas and electrical service. You will be notified prior to any planned interruptions.

### Contacts

**Lane Welch will be on site throughout the summer and will serve as the primary contract during construction. If you have questions or concerns at any time, please contact Lane at 507-226-3469 or [lane.welch@bolton-menk.com](mailto:lane.welch@bolton-menk.com).**
