

**PUBLIC OPEN HOUSE #3
Central Avenues Improvements Phase 2
Wednesday, January 29 at 5:30 p.m.
Hopkins City Hall
1010 1st St S, Hopkins MN**

The City of Hopkins will be making improvements to the streets and utilities in your neighborhood in 2025 and 2026. The attached map illustrates which streets are proposed to be reconstructed with underground utility work and which streets are proposed for maintenance and pavement resurfacing. The map also indicates the year that each block is currently scheduled for construction (2025 or 2026).

The City will have an open house to provide information on the final plans for the proposed improvements, upcoming schedule, and anticipated construction phasing for the project. The meeting has been scheduled for Wednesday, January 29 at Hopkins City Hall, upstairs in the Council Chambers. The open house will begin at 5:30 p.m. with an informational presentation. Members of the project team will be present to answer questions and receive comments after the presentation.

For those who cannot or choose not to attend the open house in person, the presentation will also be recorded and broadcast live at 5:30 p.m. through Zoom, with opportunities for questions from the audience. Residents can register to the Zoom meeting by clicking on the neighborhood meeting link, which is available on the project website:

www.HopkinsAvenuesProject.com

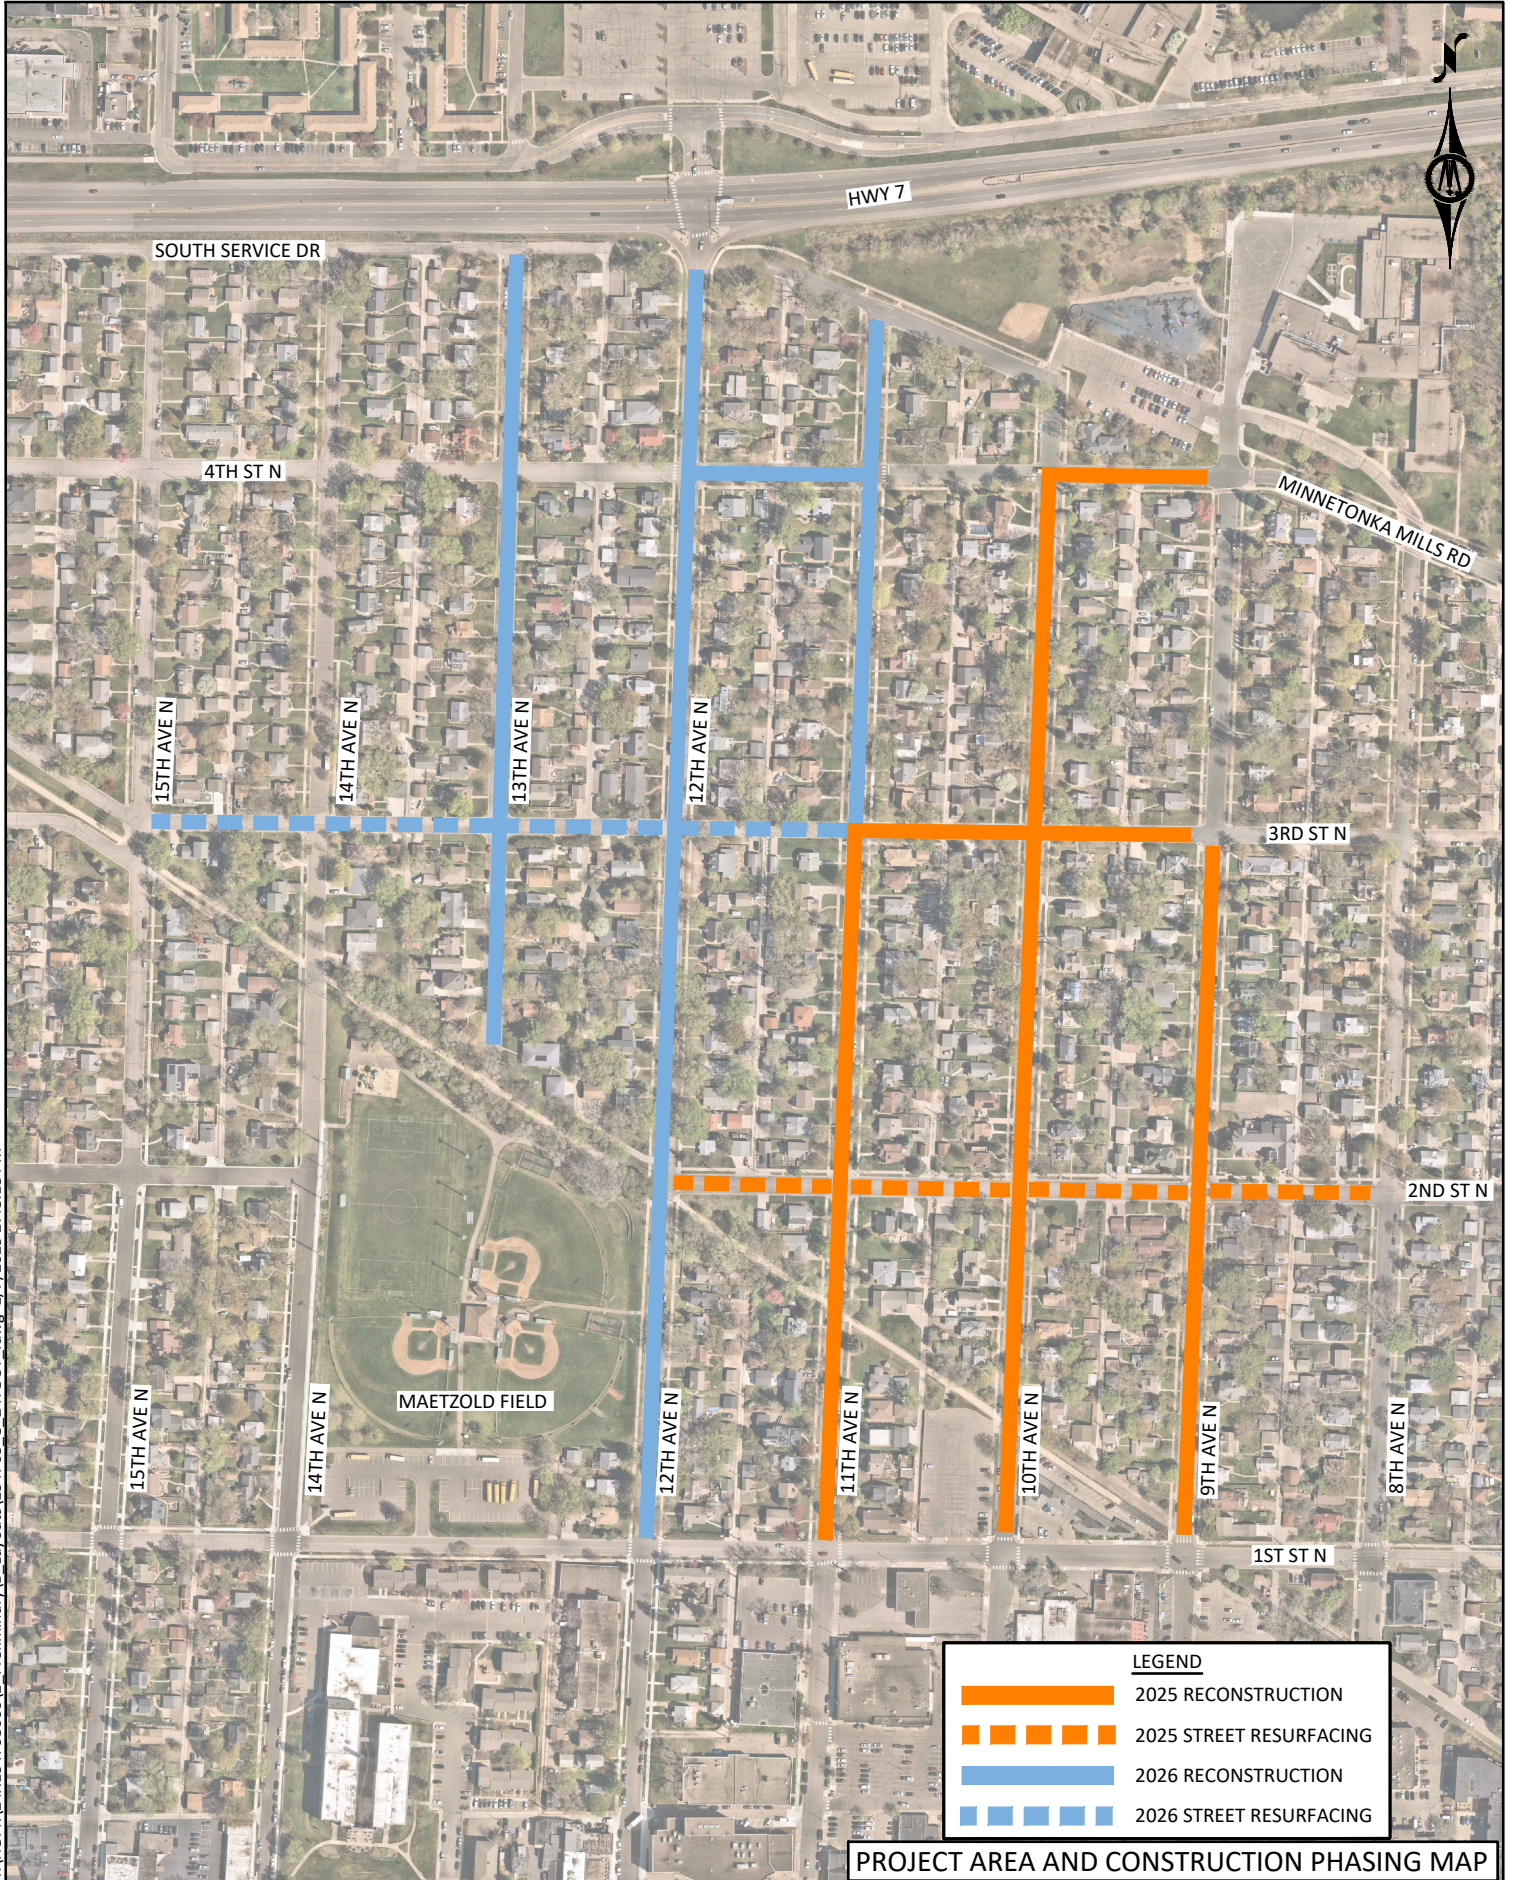

This open house is not the only opportunity to provide feedback. Residents who are unable to attend the open house can contact either of the individuals below with any questions, concerns, or comments. There will also be another neighborhood meeting held closer to the start of construction in early April.
