Overview

The City of Jordan is undertaking a construction project to extend roadway and utilities south of 190th Street and north of 195th Street, between Beaumont Avenue and Corporate Drive. Utility extensions include construction of new sanitary sewers, watermain, and storm sewer. Roadway extension includes Beaumont Avenue, being extended 1,250' south of 190th Street. A map of the project area is below.

Project Timeline & Access

Work on the project will begin mid/late June and continue until November. Work may be constructed in phases, with work initially focusing on utility construction around 195th Street prior to August, and a second phase of construction occurring near 190th Street through the late summer and fall, after the Scott County Fair. Access restrictions along 190th Street are not planned. For construction along the gravel portion of 195th Street, the project team and contractor (SM Hentges & Sons) will be reaching out to individual property owners in advance.
