

# Street & Utility Improvements

CITY OF KIESTER

## Construction Update

March 27, 2026

### Construction is planned to resume on the Kiester Street & Utilities Improvements Project on April 6<sup>th</sup>, 2026.

Project timing may change, depending on weather or unforeseen issues.

Underground crews will begin working on underground utilities on East Street, Ringer Street, and North Street.

Vehicle access to residences will be limited while crews are working on your street, so please park on a side street or an open alley during this time. Trenchless underground work on East Street and on Main Street will also resume the week of April 6<sup>th</sup>.

Occasional water shutdowns will be required to complete utility construction. The contractor will work to minimize the duration of shutdowns and provide advanced notice of any water service disruptions. Generally, you will be notified at least one day prior, and the shutdown typically lasts 2 to 8 hours.

Please continue to place your garbage and recycling bins in their typical location for pickup, and the contractor will move them to an accessible location. Please write or display your address on your bins so they can be returned to you.

If you have private improvements in the right-of-way, such as sheds, retaining walls, plants, etc. it is not the contractor's responsibility to work around them. The owner is responsible for securing these private improvements and moving them, if necessary. Neither the contractor nor the city are responsible for any damage to private improvements in the right-of-way. Any underground improvements like irrigation lines or dog fences should be located and marked so they are visible.

**Please be mindful of construction signs and careful in construction zones.**
