

Moving Forward 13-21 Construction

NEWSLETTER

Downtown Construction Begins in August!

Construction is anticipated to begin in downtown Prior Lake this August. Stage 1A (see reverse) will begin August 5 with utility work at the West Ave/County Highway 21 intersection. This work will close the County Highway 21/West Ave intersection until mid-August. After this work is complete, Stage 1B (County Highway 21 between West Ave and Main Ave) will begin and will be closed to all traffic. Stage 1B is anticipated to last from mid-August to November. Crews will then go on winter work suspension and resume the construction of Stage 2 (Highway 13/County Highway 21 intersection) in the spring of 2020.

Construction Staging Map

Local Access

In this active downtown area, it's important to note that local access will be maintained throughout construction. Local roads will be used for access in and out of business, residential, and event areas so you can still get to your favorite destinations.

How do I stay informed?
