CSAH 22 (TH 112 Turnback) Improvements Project – Water Main Shut Down

(Le Sueur, MN): The City of Le Sueur and S.M. Hentges & Sons will be conducting a water main shutdown (see attached map) on Wednesday, May 13, 2020 from approximately 8:30am to 4:30pm. The shutdown is required to install new watermain valves at the intersections of Smith/Ferry, Risedorph/S 6th Street and Ferry/S 6th Street. The shutdown area is large based on the lack of existing valves and water will be restored in smaller areas as soon as the new work allows. All affected properties will be individually notified with a door hanger.

Anyone interested in receiving e-mail updates for the CSAH 22 (TH 112 Turnback) Improvements project can do so by visiting the project website and registering for the email sign up list:

www.thenew22construction.com

Motorists are encouraged to stay alert and drive carefully through all work zones and use alternate routes whenever possible. Visit the project website for additional information.
