

# Old West Main & Upper Harbor Renewal Project

## *Construction Open House*

**When:** Wednesday, July 7th at 7:00 pm  
with a formal presentation to start right at 7:00 pm

**Where:** Council Chambers at City Hall (315 W 4th St, Red Wing, MN 55066)

Please join us for an open house to discuss construction timing and staging for the reconstruction of Old West Main Street. The City was successful in receipt of a Local Road Improvement Program grant for the project in the amount of \$831,308 and are now authorized to proceed with actual construction. The Contractor is eager to get started and has communicated a desire to start construction as soon as Monday, July 12th. The project is anticipated to require two years of construction with final completion in 2022.

The open house is intended to focus on the construction of the project during summer 2021:

- Construction Schedule
- Construction Staging Plans
- Construction Business Access
- Construction Communications Plan

In addition, please be advised that Terracon, a sub consultant of Fitzgerald Excavating & Trucking, Inc., is planning to complete the required pre-construction building Condition Survey on all buildings adjacent to Old West Main Street between Jefferson Street and Jackson Street this week. The project manager for Terracon is Kyle Shubert. The purpose of the survey is to document the condition of the structures before the start of any construction activities, along with continuous monitoring during construction and then a follow-up post construction building Condition Survey conducted at the end of construction. Thank you in advance for your cooperation to complete this project requirement.
