OLD WEST MAIN & UPPER HARBOR RENEWAL Project Update

Red Wing Riverview Skyway “Pedestrian Bridge” Update:

The parking area at the bridge entrance on Levee Road is ready for use for additional Old West Main St parking and business access.

Old West Main Street Update:

The Contractor completed the final utility work within the Jefferson St intersection this week. The contractor plans to continue with the installation of the new sand and aggregate base with goal of having the intersection ready for new concrete curb and gutter by mid next week. It is anticipated that the new concrete pavement would be poured within the intersection the last week of July. The contractor finished the new sidewalk along the north side this week and goal is to return next week to finish the north side parking lane and potentially start pouring the colored concrete infill in the boulevard area. The contractor is continuing to progress with the underground utilities heading west towards Buchanan St and anticipates being completed with all utility work through Buchanan St sometime the first week of August.
