CONTACT

The 2018 Street Improvements Project includes the reconstruction of various streets, storm sewer, and watermain throughout the City of Orono. This includes milling existing pavement sections and overlaying new bituminous pavement on Vine Place as well as Lyric Avenue from Livingston Avenue to Blaine Avenue. Additionally, mill and overlay work with storm sewer replacement and guardrail installation will be performed on Leaf Street from Bayside Road to Watertown Road and Forest Lake Landing. Work to be completed on West Lafayette Road includes watermain and water service replacement, reclamation of the bituminous surface, and construction of curb and gutter in some areas. Construction activities on Wildhurst Trail and Minnetonka Highlands Lane include storm sewer construction, curb and gutter and guardrail or portions of the roadway, and reclamation of the bituminous surface. Lastly, the northern end of Linden Lane will be realigned with some culvert replacement as well.

If you have specific access concerns or questions that need to be addressed, please do not hesitate to contact the project personnel listed at the end.

WEEK OF JUNE 18

Reclamation of the pavement on West Lafayette Road has been completed and temporary water is currently being set up and tested. The new watermain is being fused to prepare for directional drilling. Please be aware of temporary water lines while mowing lawns.

**Please note that all scheduling claims are subject to change.*

WEEK OF JUNE 25

When water testing passes, the contractor will be contacting home owners on West Lafayette to gain access to hook up the temporary water system. Notifications will be left on doors to establish contact with the affected residents. Starting on Monday, directional drilling will occur. This involves digging three drill pits and moving the fused main around for drilling. The road will remain open, however, some areas of roadway may be down to one lane. Please drive cautiously throughout the area.
