

2021 DOWNTOWN SOUTH RECONSTRUCTION

PROJECT OVERVIEW

The City of Prior Lake will be reconstructing parts of Colorado Street, Main Avenue, and Pleasant Street in 2021 (see map below). This will include replacing watermain, sanitary sewer, and storm sewer, roadway base, and pavement.

In preparation for this work, the city will be preparing a Feasibility Report for the reconstruction area, which includes gathering existing condition data on the construction area. Surveying began this week and will continue throughout the coming weeks. Geotechnical borings, which obtains samples of the soil structure in the reconstruction area, will also be gathered on Friday, February 28, weather permitting.

HOW CAN I GET INVOLVED?

The city will be hosting a neighborhood meeting and a public open house in the coming weeks to introduce the project, share schedule and what to expect, and allow the public to share comments and concerns. A separate invitation will be sent to you for these events.

QUESTIONS?

Have any questions or concerns? Reach out to the project Help Line at 612-357-7270 or email Nicole Schmidt at Nicole.Schmidt@bolton-menk.com.
