

This project is intended to begin the transformation of the Broadway Avenue corridor (from Civic Center Drive to 13th Street North) into a significant multi-modal gateway to downtown Rochester and the Destination Medical Center (DMC) Development District.

## CONSTRUCTION UPDATE

Elcor Construction will start phase two of the reconstruction of North Broadway Avenue on April 4, 2022, weather permitting. Construction will focus on the alleyways and side streets adjacent to North Broadway. Work is scheduled 7am to 7pm Monday through Friday. Some Saturday work may occur if construction falls behind. The project has an expected completion date of September 2022.

Impacts to alleyways and side streets:

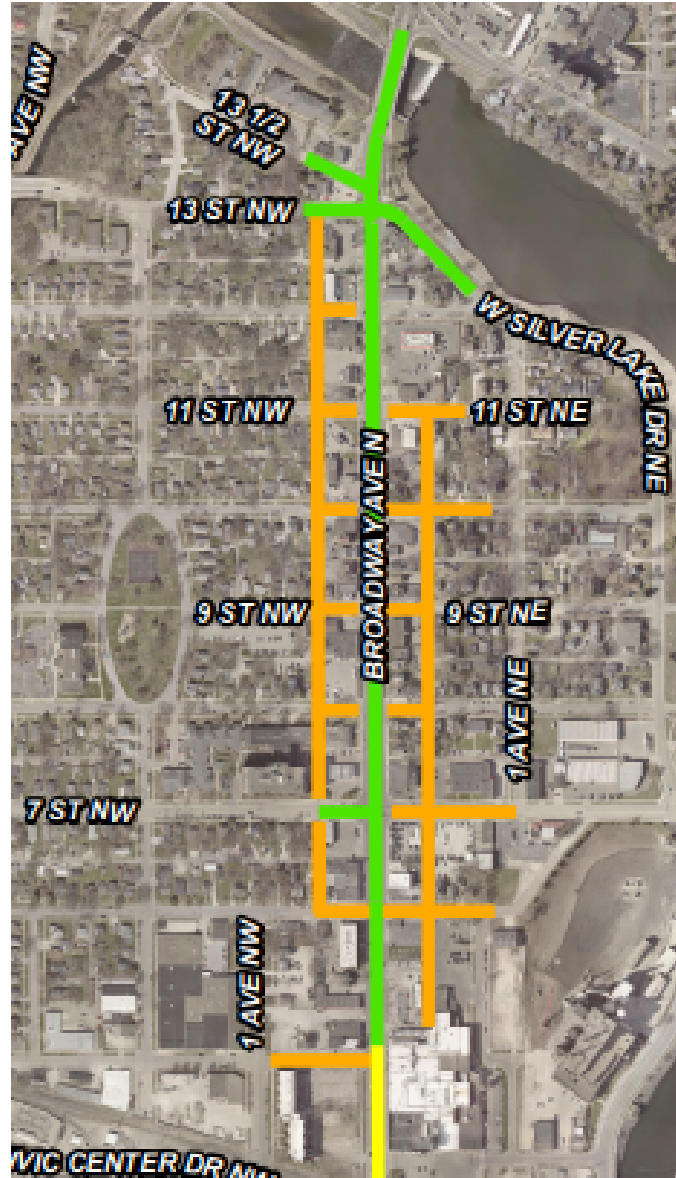

- Construction will begin on March 28 with milling of the alleyways and side streets. Work will progress from north to south, first on the east side of Broadway Avenue and then the west, and will only affect access in the areas where construction is actively occurring.
- Next contractors will begin installing underground utilities. Locations under active construction will be completely closed for several days and then re-opened with a gravel surface. Construction will then move to a new location within the project area and repeat the process. Detour signs will be posted for each work location.

[www.ReconstructBroadway.com](http://www.ReconstructBroadway.com) will include regular updates, a construction schedule, and links to the stakeholder meetings..

Bi-Weekly stakeholder meetings to present the high-level schedule and answer any additional questions start March 30, 2022.

Work on Broadway Avenue in 2022 will include landscaping, installation of railing, completion of bus stops, and electrical work. Additional information will be included in the next newsletter, and was included in a letter sent to all stakeholders.

*\*All dates are weather-dependent.*

- █ Open to vehicles, pedestrians, and cyclists with minimal impact
- █ Open to vehicles, impacts to pedestrians and cyclists
- █ Street and sidewalk reconstruction - impacts and timing will vary

## PLEASE JOIN!

Stakeholder meetings will be held the first and third Wednesday of each month. The link for the meeting can be found on the Get Involved Tab.
