## Overview

The NDDOT in coordination with the City of Valley City is invested in maintaining and improving the quality of the transportation network in Valley City. The preventative maintenance project will consist of a mill and overlay on Main Street W and Frontage Road. This improvement will recover ride comfort and create a roadway that will last for years to come.

## Milling & Paving

**Starting Wednesday, May 24th, crews will be milling the existing asphalt throughout Main St. beginning with west bound lanes.** The existing roads are in rough condition for traffic, so by removing the existing pavement it allows a level evenly sloped surface to lay the new asphalt on, as well as assuring the road is even with the curb height.

Construction areas and signing will be changing on a consistent basis, please pay attention and adhere to construction signage and activities. Access to businesses on North side of Main St. may experience brief closures.

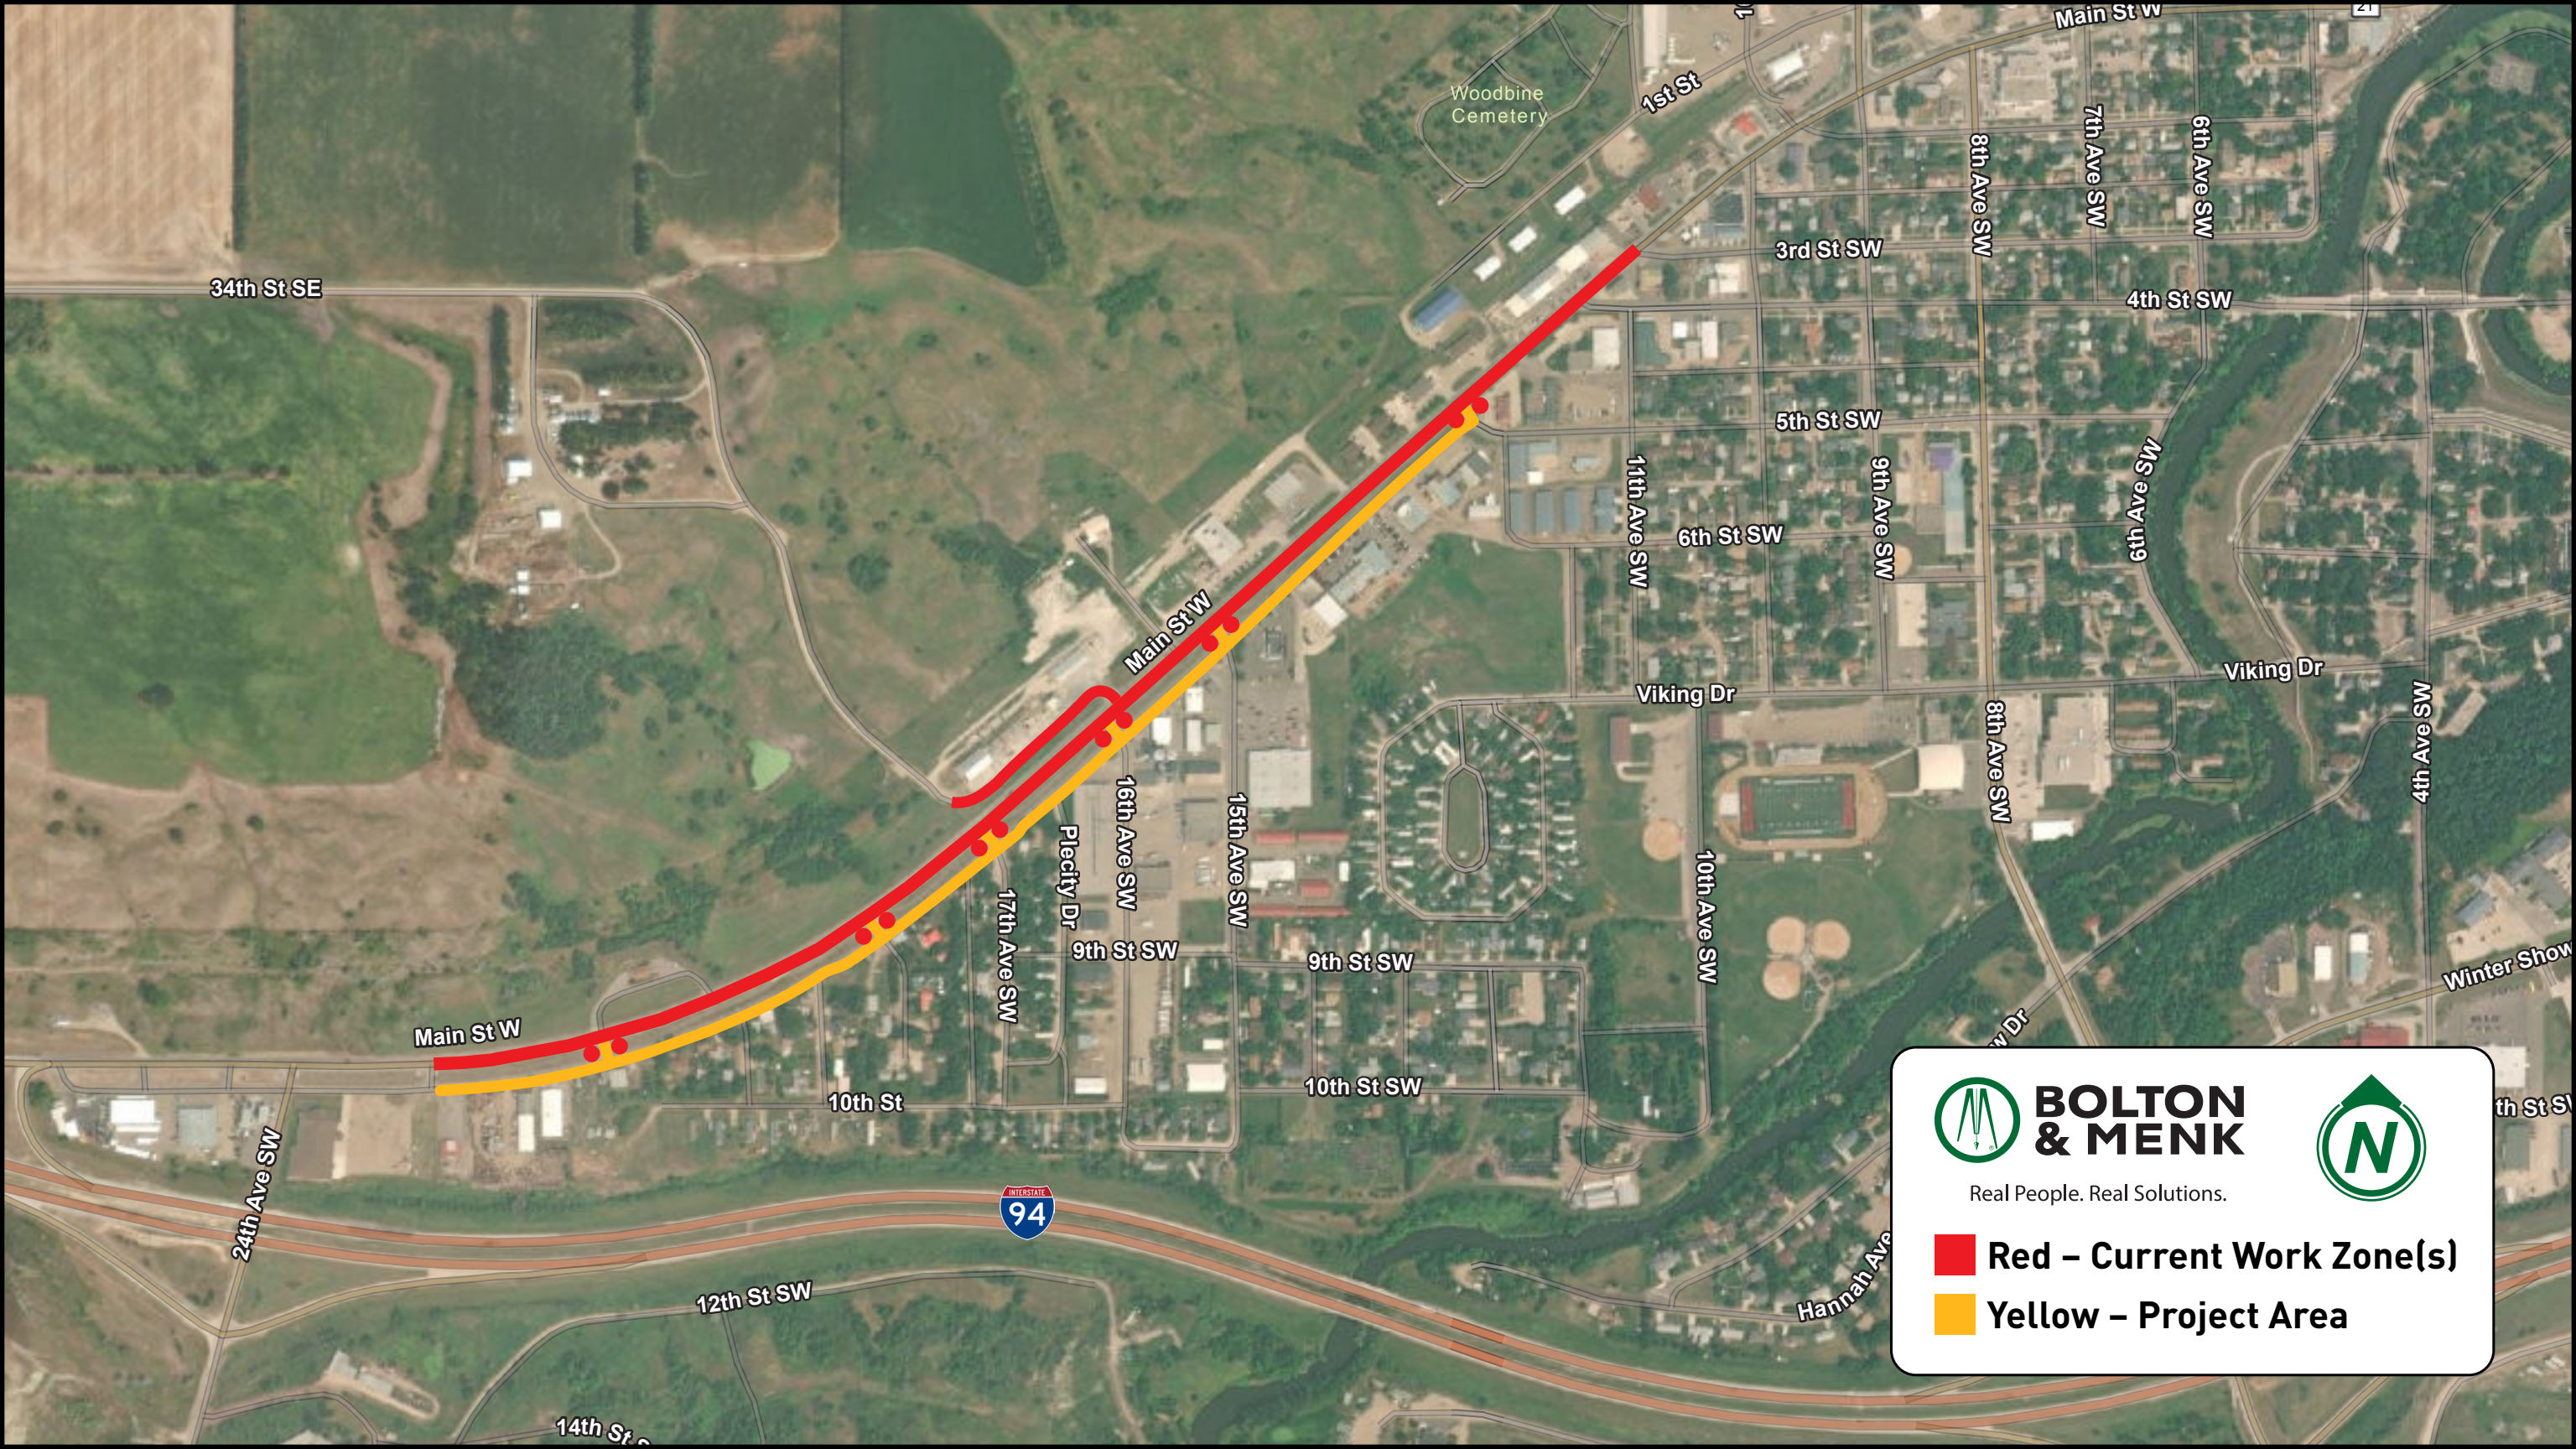

## Contacts

**Matt Clevenger will be on site throughout the project and will serve as the primary contact during construction. Matt can be reached at 701-261-5314 or [Matt.Clevenger@bolton-menk.com](mailto:Matt.Clevenger@bolton-menk.com).** Newsletters, such as this one, will be posted to the project website throughout the project duration if needed. If you have questions or concerns at any time, please contact Matt at the number or email address listed.
