

Community Engagement Schedule

Street & Utility Improvements and Downtown Streetscape Plan

The City of Wabasha is planning for the reconstruction of streets and utilities within portions of the downtown in the summer of 2023. In conjunction with this project, the city will be completing planning tasks that help to guide the streetscape aesthetic in and around the downtown. These tasks will be completed in parallel with the street project, and the outcomes captured in the Downtown Streetscape Plan. See the specific project website for more details.

2023 STREET & UTILITY IMPROVEMENTS

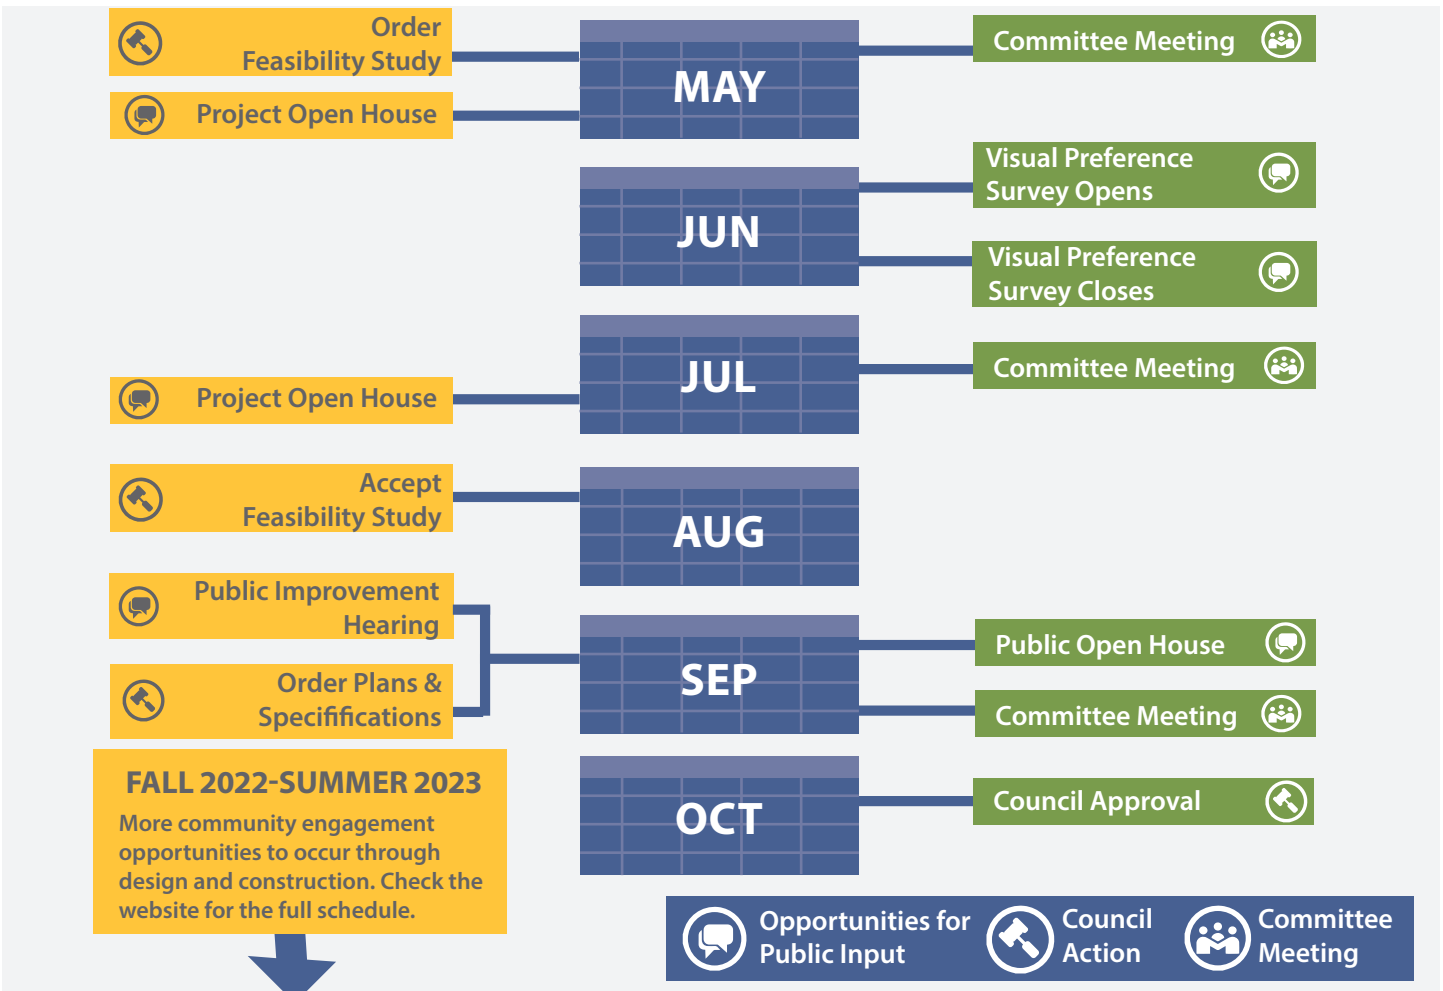

The street improvements will consist of the full reconstruction of streets, sidewalks, sanitary sewer, watermain, and storm sewer.

- Bridge Avenue from 4th Grant Blvd W to Main Street W
- Main Street W from Bridge Avenue to Pembroke Ave
- Pembroke Avenue from Main Street W to 4th Grant Blvd W

DOWNTOWN STREETScape PLAN

The streetscape plan will consider the following elements in and around the downtown:

- Wayfinding & community entry signage
- Downtown identity & site amenities
- Enhancing underutilized spaces under the bridge
- Strengthening the connection to beach park
- Enhancing trail connectivity along the river

How Can I Provide Input?

Project open houses will be tailored to the reconstruction project and those directly impacted by the work. Streetscaping elements will be defined with the Streetscape Plan and incorporated into the final design.

How Can I Provide Input?

You can provide input through participation in the visual preference survey and attending the public open house. The Streetscape Steering Committee will be reviewing public input and providing a recommendation to the City Council.
