Greg Graves
Emergency Contact
Phone: 320-287-1916

Project Update

The project has reached substantial completion with only the following items of work to be completed:

- Crosswalk Pavement Markings
- Punch List

Punch List

After the project is substantially complete, the contractor will be provided with a “punch list” of minor defects or uncompleted tasks. This work may take several weeks to complete and will occur over the next month or two. Punch list work will require both your cooperation and patience. Please contact Dalton Lindstrand for any issues you feel have not been satisfactorily addressed due to the project near your property.

Turf Restoration

A method called “hydro-seeding” was used for restoring areas of grass disturbed by the project. Upon the Contractor completing seeding activities, it becomes the property owner’s responsibility to maintain the new turf as part of their lawn – providing water, mowing and other necessary care. Please follow the [“Newly Seeded Lawns \(LINK\)”](#) management document to ensure the growth and development of the seeded areas. **To assist in seed germination and successful turf establishment, homeowners are encouraged to water the seeded areas.**
