

Cleveland Avenue West Area Street & Utility Improvements Project

March 2024

Private Utilities (Gas, Communication, Electric)

Michaels (CenterPoint's Contractor), Benco and Mediacom will be working in the area to relocate various gas lines, communication lines and poles. This work is not under the direction or supervision of the City but is necessary to prepare for the proposed utility and street construction and to update their aging facilities. Your service may be interrupted briefly. If you have issues with any private utility service, please contact that provider directly.
