

Approved Vendor/Contractor List for Water Softener Optimization and Replacement

Approved optimizers have completed training from Bolton & Menk and the Minnesota Water Quality Association to ensure they can optimize (adjust settings for lowest salt use) water softeners or replace eligible water softeners to help meet the city's chloride reduction goals. Choose one to call to check your water softener and/or provide an estimate to replace or upgrade your water softener to a more efficient system.

| Company | Phone Number | Water Softeners Serviced |
|-------------------------------|--------------|---------------------------------|
| Culligan Water of Worthington | 507-376-4441 | Culligan + all makes and models |

Note: Currently there is only one local contractor on the list since there is only one in town. Other water conditioning dealers or plumbers may participate by contacting WPU and attending required training.
