Overview

KPH, Inc. and the City of Wyndmere are beginning the reconstruction of the Storm Sewer and Street Improvements Phase 1B project. This project will build on the project constructed last year and will include storm sewer, water system improvements, and new street construction.

Project Update

Weather has continued to be on the side of construction work this summer. Hot and dry! All utilities (apart from storm sewer crossings on Gilead Ave) have been installed. Things will begin to start looking like a roadway again beginning with concrete curb and gutter which will begin approximately 8/25. Curb and gutter installation is scheduled to take place over the next two weeks. Final roadway grading and preparation will take place after that and bituminous paving will follow beginning after labor day.

Contacts

Matt Clevenger will be on site throughout the summer and will serve as the primary contact during construction. Matt can be reached at 507-456-3687 or matt.clevenger@bolton-menk.com. Informational newsletters, such as this one, will be posted to the project website (<https://clients.bolton-menk.com/wyndmereimprovements/>) throughout the summer. Hard copies will also be available at City Hall. If you have questions or concerns at any time, please contact Matt at the phone number or email address listed.

Photos

Alert

Detour and Access

During construction, access through the construction zone will be difficult and/or limited depending on the construction activity taking place. Local traffic should obey road closed signs and find alternate routes around the active construction zone.

When possible, the contractor will provide temporary gravel for driveway access within the construction site. However, direct driveway access may be limited when excavation and other construction activity is occurring. In addition, when concrete curb, walk, and driveways are being constructed, access to driveways will be restricted for extended periods.

Wet weather will also make access difficult for periods of time. Please monitor the weather throughout the summer and plan accordingly. If rain is forecasted, residents are advised to park on adjacent streets to ensure that vehicles do not get trapped in driveways or stuck in mud.

Please also be advised that if you choose to drive on the closed road, there can sometimes be construction debris or other items that can damage vehicles. Driving through the construction site is at your own risk. If you are concerned about access during construction, or have questions, please contact Matt.

Garbage and Mail

Garbage and recycling collection will continue on its regular schedule during construction. You should set your garbage and recycling containers out as you normally would. During times when the garbage truck is unable to access the front of your property for any reason, the contractor will label and move them to an accessible location for pickup and return them to you after collection.

Mail delivery will continue during the project. The contractor will set up temporary mailboxes in a centralized location that will be accessible to the postman. You will be notified if your mailbox location will be affected.

Construction Safety

Work Area

It is very common on these types of projects that area residents (especially children) become quite curious about the work the Contractor is performing. We ask that you please be respectful of and stay well clear of construction zones. Many hazards and dangers exist from heavy machinery, trenches, loose material, confined spaces, hot asphalt, etc. and often times are not recognizable by the general public. The Contractor has responsibility to ensure safety on the project and within the construction area. Any direction from the Contractor regarding safety must be heeded; likewise, if you observe an unsafe condition please report it to the Construction Representative immediately.
