If you wish to receive a direct email with the newsletter, you may sign up for this also on the website.

PROJECT STATUS AND UPCOMING WORK

- For the week of July 22, expected work includes the following:
 - The focus this week will be on watermain installation, picking up from the first stage of installation at 12167 Fremont Lane and working west from there.
 - Underground utility installation is complete on the first phase of the project on the east end of Fremont Lane and work to reestablish the roadway will get underway.
 - We are communicating with the garbage haulers to make sure everyone's trash is getting picked up.
- Please see to the care of children and other vulnerable individuals during construction and be aware of the movement of construction equipment so that everyone will be safe while the work is being completed.
- The project will certainly create inconveniences and frustrations for residents, so we ask for your patience while work proceeds with this important project.
- Should you have any questions, please feel free to contact Kevin Bittner, City Engineer. His contact information is provided on the left-hand side.
