If you wish to receive a direct email with the newsletter, you may sign up for this also on the website.

### PROJECT STATUS AND UPCOMING WORK

- The underground utility work has been completed.
- Grading of the roadway and placement of aggregate base will continue through the week.
- The contractor has indicated the potential that they will start placing the first lift of the bituminous pavement by Friday the 23<sup>rd</sup>.
- This work will generate considerable truck traffic so please be aware of the additional construction traffic that is occurring.
- In addition, the grading work and construction traffic has generated considerable dust on the project. Please be aware that due to the current dry conditions, the City is having to manage their water supply very closely, which limits the amount of water available for dust control.
- Please see to the care of children and other vulnerable individuals during construction and be aware of the movement of construction equipment while traveling so that everyone will be safe until the work is completed.
- Should you have any questions, please feel free to contact Kevin Bittner, City Engineer. His contact information is provided on the left-hand side.
